Popular Applications

How Does it Work?

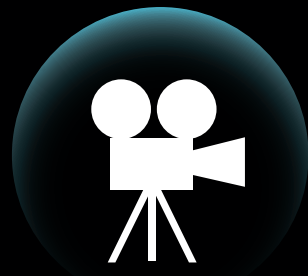

1. Cube connects to any existing IP network, or creates its own WiFi network.
2. Cube connects to any video camera and compresses the video to HD H.264.
3. Broadcast your content via WiFi, ethernet, or over 3G/4G cellular modems.*

What's Your Market?

BROADCAST

CINEMA

LIVE EVENT

Cube™ is a top-performer in any industry. From cinema to live events, Cube™ gives you the freedom to stream your video wirelessly to the platform of your choice.

The Cube™ Family is the world's first camera-top HD video encoder solution. Cube™ Encoders has either SD/HD-SDI, HDMI or composite inputs and stream HD video over dual-band WiFi, wired Ethernet, or USB to a 3G/4G modem. Cube™ also features a CDN integration for turnkey live event streaming and video hosting on the Internet. This allows you to stream video to your own website or Facebook page within minutes.
